# Earthwool Loft Roll 44

## Applications

Earthwool Loft Roll 44 is available in a range of thicknesses with a thermal conductivity of 0.044 W/mK.

Combi-cut products have partially cut perforations, providing the flexibility to be used between joists at either 400mm or 600mm centres, or used unsplit as a full-width roll.

Ready-cut products are fully cut, and are designed to be used between joists at 600mm centres.

## Performance

### Thermal

- **Thermal conductivity:** 0.044 W/mK

### Fire

- **Classification:** EUROCLASS A1 to BS EN 13501-1

### Vapour Resistivity

- **Water vapour resistivity:** 5.00 MNs/m²

## Benefits

- **Euroclass A1 non-combustible**
- **Lightweight quilt for ease of installation**
- **Available as:**
  - Partially cut rolls for use with:
    - timber joists at 400mm centres or,
    - timber joists at 600mm centres or,
    - unsplit as a full-width roll.
- **Partially cut, shorter length rolls**
- **Ready cut rolls for use between joists at 600mm centres**

## Certification

- **Green Guide Rating:** A+
**EARTHWOOL LOFT ROLL 44**

**ADDITIONAL INFORMATION**

**Durability**
Earthwool Loft Roll 44 is odourless, rot proof, non-hygroscopic, does not sustain vermin and will not encourage the growth of fungi, mould or bacteria.

**Application**
Earthwool Loft Roll 44 is primarily used for the thermal insulation of pitched roofs at ceiling level, it can also be used to thermally insulate floors. When used at ceiling level it is usually laid in two layers, with the first layer between the joists and the second layer over, and at right angles to the joists.

**Standards**

**Environmental**
Earthwool Loft Roll 44 represents no known threat to the environment and has zero Ozone Depletion Potential and zero Global Warming Potential.

**Vapour resistivity**
Earthwool Loft Roll 44 offers negligible resistance to the passage of water vapour and has a vapour resistivity of 5.00 MNs/g.m.

**Handling and storage**
Earthwool Loft Roll 44 is easy to handle and install, being lightweight and easily cut to size, where necessary. It is supplied in polythene packs which are designed for short term protection only. For longer term protection on site, the product should be stored either indoors, or under cover and off the ground. Earthwool Loft Roll 44 should not be left permanently exposed to the elements.

Knauf Insulation mineral wool products made with ECOSE Technology® benefit from a no added formaldehyde binder, which is up to 70% less energy intensive than traditional binders and is made from rapidly renewable bio-based materials instead of petroleum-based chemicals. The technology has been developed for Knauf Insulation’s glass and rock mineral wool products, enhancing their environmental credentials without affecting the thermal, acoustic or fire performance. Insulation products made with ECOSE Technology® contain no dye or artificial colours.
